 Tests **Target hosts** Help erhan@erhanayas.com

Welcome to Loader.io!

Before creating your first test, we need to verify that you own the host you'll be testing. Click the button and we'll walk you through the process.

[+ New Host](#)

[Learn more about creating and verifying target hosts](#)

Sitemizi yazdık ve next ile ilerleyelim.

Tests Target hosts Helperhan@erhanayas.com

New target host

Domain

Hints

- Specify the port (e.g. :8080) if using something other than port 80 (for HTTP) or port 443 (for HTTPS)
- You do **not** need to specify the scheme ([http://](#) or [https://](#)) - we will check both automatically.
- You should **not** specify any URL path.

[For more details, see this article](#)

Bu ekranda aşağıda belirtilen dosyalardan bir tanesini indirip web serverımıza aktarmamız gerekmektedir. İndirme işlemi yapıyorum ve sitemin kurulu olduğu dizine aktarıyorum.

Tests Target hosts Helperhan@erhanayas.com

Target Verification: www.erhanayas.com

1 Place this verification token in a file:

Or the file you need.

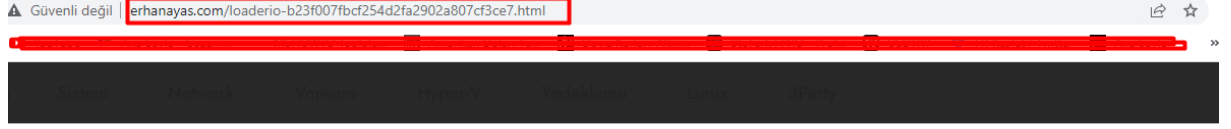

2 Upload the file to your server so it is accessible at one of the following URLs:

- <http://www.erhanayas.com/loaderio-b23f007fbcf254d2fa2902a807cf3ce7.txt>
- <http://www.erhanayas.com/loaderio-b23f007fbcf254d2fa2902a807cf3ce7.html>
- <http://www.erhanayas.com/loaderio-b23f007fbcf254d2fa2902a807cf3ce7/>

İndirdiğimiz dosyayı siteye ekledik ve test ediyorum.

<http://www.erhanayas.com/loaderio-b23f007fbcf254d2fa2902a807cf3ce7.html>

Başarılı bir şekilde ulaşıyoruz.

Erhan Ayas / IT Administrator

Bağlantıyı loader ile kontrol ediyoruz.

New Test ile ilerleyelim.

All tests

+ New Test

Show: Active Completed Draft Scheduled Archived Sort: Newest Oldest Search for tests, uris, tags, and notes Go!

Some tips to get started...

- 1 Start testing your application today to see how it handles under different situations. You can create different scenarios by using different combinations of time and concurrent users.
- 2 We recommend a test that increases the number of users over time to simulate at what point your application might slow down, deliver errors and potentially crash. Be sure to start with a small number of concurrent users and test over a short period of time until you are confident your server can handle increased loads!
- 3 If you notice issues, tweak your environment, run another test and compare the results. It's easy!
